Customizable Length

Construction and Finish

1. The Box Series Fused Planters are available in Carbon Steel, Corten Steel and Aluminum alloys. Thickness is based on designer specification, and/or manufacturer recommendation for size.
2. Form and Fiber can customize metal box planters into "fused" groups of the same height, in lieu of individual planters for large installations.
3. Fused groups will have shared (lowered) internal walls, for on-site connection, with an optional horizontal 1-1/2" lip running the entire length of the grouping. When assembled on-site, grouping of multiple planters can visually reflect one continuous unit.
4. Finishes include Pre-Weathering for Corten Steel or Powder Coated finishes for Carbon Steel or Aluminum with an exterior grade powder coat finish, available in standard stock and non-standard stock RAL colors, including metallics. Marine grade finish can be provided for an upcharge per unit.
5. Fused systems can be manufactured with or without a 1-1/2" lip and standard 1", 1.5", or 2" drain holes or no drain holes.

Pricing

1. Unit and group prices are based on designer specified dimensions and US Steel and Aluminum prices. Contact Form and Fiber for individual pricing for your project.
2. Pricing may vary, based on thickness and reinforcement requirements.

Powder Coat Colors

1. Standard F&F stock powder coat colors are offered in satin and matte finishes as noted.
2. Non-standard stock RAL colors and metallics are available and may require an additional up-charge

* Note: not all boxes will require internal reinforcement as shown

Provided

1. Form and Fiber provides connecting hardware for interior brackets connecting sections.

Not Provided

1. Form and Fiber DOES NOT PROVIDE waterproofing caulking or sealant for section connections.

F&F standard stock polyester powder coat colors
